

SUDELIM S.A. DE C.V.

**LINE OF
PRODUCTS**

OUR CERTIFICATIONS

ORGANIC PEROXIDES

We have a range of organic peroxides, diacyl, peresters, temperature controlled, etc. Among which stands out:

Benzoyl Peroxides:

- Initiator (catalyst) in the manufacture of resins for paint, ink and monomer polymerization, packaging, industries.
- Active ingredient present in bacteriological skin creams.
- Active ingredient in the formulation of wheat flour and dairy whiteners.

We are manufacturers of polymerization and reaction initiators widely used in the polymerization industry; cross-linking and curing agent for polyester resins thermo-fixed and silicone rubber, compound hardener for automotive patching, etc.

Benzoyl peroxide powder 74 to 76%	Mainly as an initiator in polymerization, and curing agent for acrylic resins a solved resin polyester and silicone rubber.
Benzoyl peroxide Fine 74 to 78%	Mainly used as an initiator in polymerization and curing agent for resins thermo-fixed polyester and silicone rubber.
Benzoyl peroxide in blue paste	Compound hardener for automotive patching. (buckets and tubes)
Benzoyl peroxide in red paste	Compound hardener for automotive patching. (buckets and tubes).
Benzoyl peroxide in white paste	Acrylic floor crosslinking processes; Curing Resin-Based Resonators polyester used in the repair of auto parts. (buckets and tubes)
hydroperoxide terbutyl	Polymerization and polymerization initiator, resin curing, propylene epoxidations; As fuel and fuel additive
hydroperoxide cumene.	Polymerization and polymerization initiator, resin curing, propylene epoxidations; As fuel and fuel additive.

peroxide diterbutyl.	Polymerization initiator, combustion additive, synthesis intermediate organic.
Perbenzoate terbutyl.	Polymerization initiators.
dicumyl peroxide at 40%	Cross-linking agent and polymerization initiator.
dicumyl peroxide at 99%	Cross-linking agent and polymerization initiator.
Di-teramil peroxide cyclohexane 80%	Initiator widely used in the polymerization of styrene monomers, of methyl methacrylate, vinyl, ethylene and in the vulcanization of various elastomers.
Di-Ter-amil Peróxido	Initiator widely used in polymerization industry monomers of styrene, methyl methacrylate, vinyl, ethylene and in the vulcanization of various elastomers.
peroctoate 99% tertbutyl	Reaction initiators for industrial use.
CO-100-AC	Catalyst for curing resin-based products at room temperature unsaturated polyester.

BLEACHERS OF FLOUR

Blanarin 27

Wheat flour bleacher.

Blanarin 32

Wheat flour bleacher.

BLEACHERS FOR MILK AND CHEESE

Milk, cheese and whey whitener, based on benzoyl peroxide with a mixture of food grade components, prepared with calcium sulfate, corn starch and silicon dioxide.

ADDITIVES

We manufacture correctors for problems presented in the different processes of the paint manufacturing.

PYC-22 Anti-skin agent for solvent-based system.

Anti-skin agent in alkyd paints, varnishes and oil paints.

PYC-37 Non film forming humectant and dispersant for water-based system.

Humectant and dispersant of pigments and fillers for water-based systems.

PYC-39 Thickener for solvent-based system.

Solvent thickener for solvent based system.

N-N Dimethyl Aniline.

Chemical product for synthesis and accelerator curing polyester resins.

6% cobalt octoate.

Accelerating agent in cross-linking processes polyesters and drying agents in alkyd enamels.

Potassium octoate 20%.

Catalyst, help in some processes.

Separator film.

Additive to facilitate demolding in pieces.

PYC-500 Non film forming wetting and dispersant film for water-based system.

Humectant and dispersant of pigments and fillers for water-based systems.

PYC-R Accelerator for polyester resins.

Accelerator agent in the processes of polymerization when looking for low coloration in the curing of polyester resins.

PYC-41 Solvent-based antisedimentant.

It can be used to replace aluminum stearates and other metal soaps of this family.

PYC-38-01 Solvent-based liquid thickener

Viscosity corrector in solvent-based paints.

PYC-33 Anticrater for solvent based system.

To prevent the formation of craters, eyes of fish, pores in coatings based on solvents.

PYC-21 Antifoam for water-based system.

For all types of aqueous systems including paints based on emulsions in themselves and in others aqueous systems requiring antifoam efficient and safe.

PYC-15 Anti Floating powder.

To correct cases of imperfection of finishes, called; Flooding, Floating and Fluted.

PYC-35 Water-based humectant and dispersant solvent base paints.

Wetting and dispersing agent in systems water and solvent based paints.

PYC-36 Special Wetting and dispersant base solvent

Wetting and dispersing agent in systems paints in solvents.

PYC-36 Solvent-based humectant and dispersant.

Wetting and dispersing agent in systems paints in solvents.

PYC-34 solvent base paints humectant and dispersant.

Wetting and dispersing agent in systems paints in solvents.

PYC-147 Bactericide and fungicide.

Canned protection for paints and coatings water-based against bacteria and fungi.

Co Formula 3 Resin polymerization accelerator.

Accelerator agent in the processes of polymerization when looking for low coloration in curing polyester resins

MULTI-USE BIOCIDES

PYC-55

Biocide based on Zinc Nanoparticles, has demonstrated its capacity in various media for industrial use.

Solid, stable material, free of dust and highly respectful of workers and the environment, it can be used successfully with 99.99% protection against fungi and bacteria in aqueous media.

It can be applied in paints, gypsum panel manufacturing in those solid products that require microbiological protection, paper recovery, adhesives, cutting oils, immersion vats, foundry paints.

PIGMENTS

We manufacture pasted pigments to be used in manufacturing in different systems: water-based, polyester-based and alkyd-based.

PIGMENT WATER BASED SYSTEM

Blue pigment.

Black pigment.

Red pigment.

Green pigment.

Chrome yellow pigment.

Rust yellow pigment.

Yellow line pigment.

White pigment.

Orange pigment.

PIGMENT SOLVENT BASED ALKYDAL SYSTEMS

Black pigment.

Rust red pigment.

Vermillion red pigment.

Rust yellow pigment.

Reddish chrome yellow pigment.

Precious chrome yellow pigment.

Green pigment.

White pigment.

PIGMENT BASE SYSTEM POLYESTER (reinforced plastic)

Orange pigment.

Chrome yellow pigment.

Rust yellow pigment.

Yellow line pigment.

Blue pigment.

Pearl gray pigment.

Black pigment.

Red pigment.

Green pigment.

Brown pigment.

White pigment.

Rust red pigment.

Beige pigment.

SANITIZERS

Sanitizers for surfaces and workplaces, based on quaternary ammonium salts and silver nanoparticles.

Applicable by thermonebulization and spraying

DETERGENTS

Powder and liquid detergents for hospital linen, the food, hotel and industrial uses, bleachers, disinfectants.

Morpheus gel soap.

Cleaning of wood, leather, vinyl, paint and finishes in general washable in water.

Color fixative.

For the treatment of faded colors and for the treatment of garments with discoloration problems.

1.5% disinfectant based on silver nanoparticles.

Disinfection of surfaces and common areas, in hospitals, offices, schools, restaurants.

Product pre-washer.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Chlorine and alkalinity neutralizer.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Organic bleach powder.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Controlled foam powder detergent.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Liquid detergent for white, colored and black clothes.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Powder detergent for white clothes.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Neutral liquid laundry detergent.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Fabric softeners.

For washing hospital linen, food and hotel industry linen, industrial clothing.

Liquid bleach with 6% active chlorine.

Disinfectant and bleach for all types of white clothing.

Tablecloth and stain degreaser.

Industrial stain remover for tablecloths.

SUD-161 Car Shampoo.

Car shampoo.

SUD-173 Shampoo for cars with protection.

Car shampoo with protection.

SUD-166 Engine degreaser.

Engine degreaser.

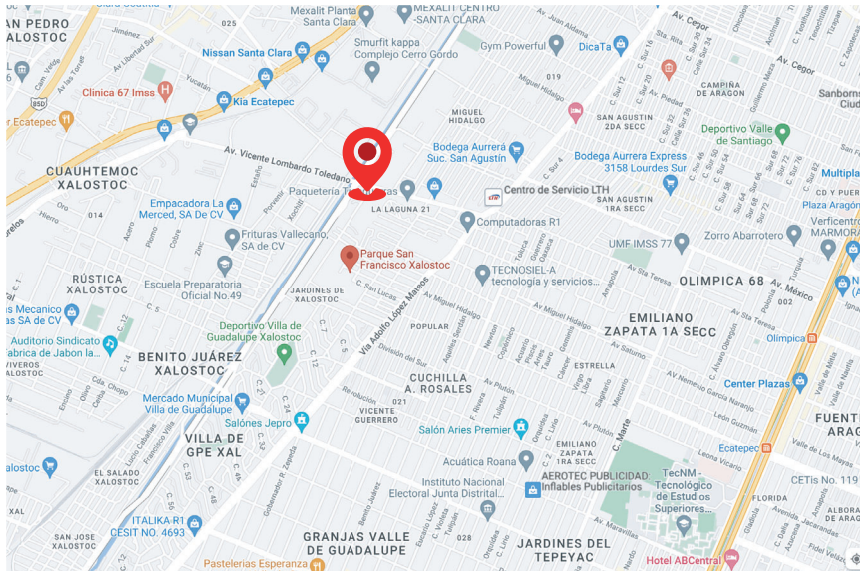

SUD-109 Glass and smooth surface cleaner.

Cleaner for glass and smooth surfaces.

SUD-163 Vinyl cleaner.

Vinyl cleaner.
